

Permanent Edition Himeji City Flood/Landslide Disaster Hazard Map Wide Area 7

The Flood/Landslide Disaster Hazard Map anticipates damage caused by flooding and landside disasters and forecasts the scope of this damage on the map. This information includes potential flood zones as well as floodwater depths. The possible flood zones shown in this map forecast rivers overflowing with water due to the highest amount of rainfall thought possible in Hyogo Prefecture (L2: largest potential rainfall is equivalent to a 1,000-year rainfall). This information also includes the potential scope of housing collapse near rivers due to bank erosion and flood waters. Hyogo Prefecture surveyed potential landside disaster zones for this landslide disaster information according to the Act on Sediment Disaster Countermeasures for Sediment Disaster Prone Areas. This map shows areas designated as landslide disaster warning zones and landslide disaster special warning zone.

Evacuate by referring to the warning level!!

Everyone living in an area where a warning level of 3 or 4 has been issued should immediately evacuate to a safe place!

Warning level 5 Emergency Safety Measures
Disaster ongoing! Immediately take action in the best way to protect lives!

Warning level 4 Evacuation Order
Everyone should evacuate from a danger zone!

Warning level 3 Evacuation of Elderly and Others
Evacuation of elderly and others from a danger zone!

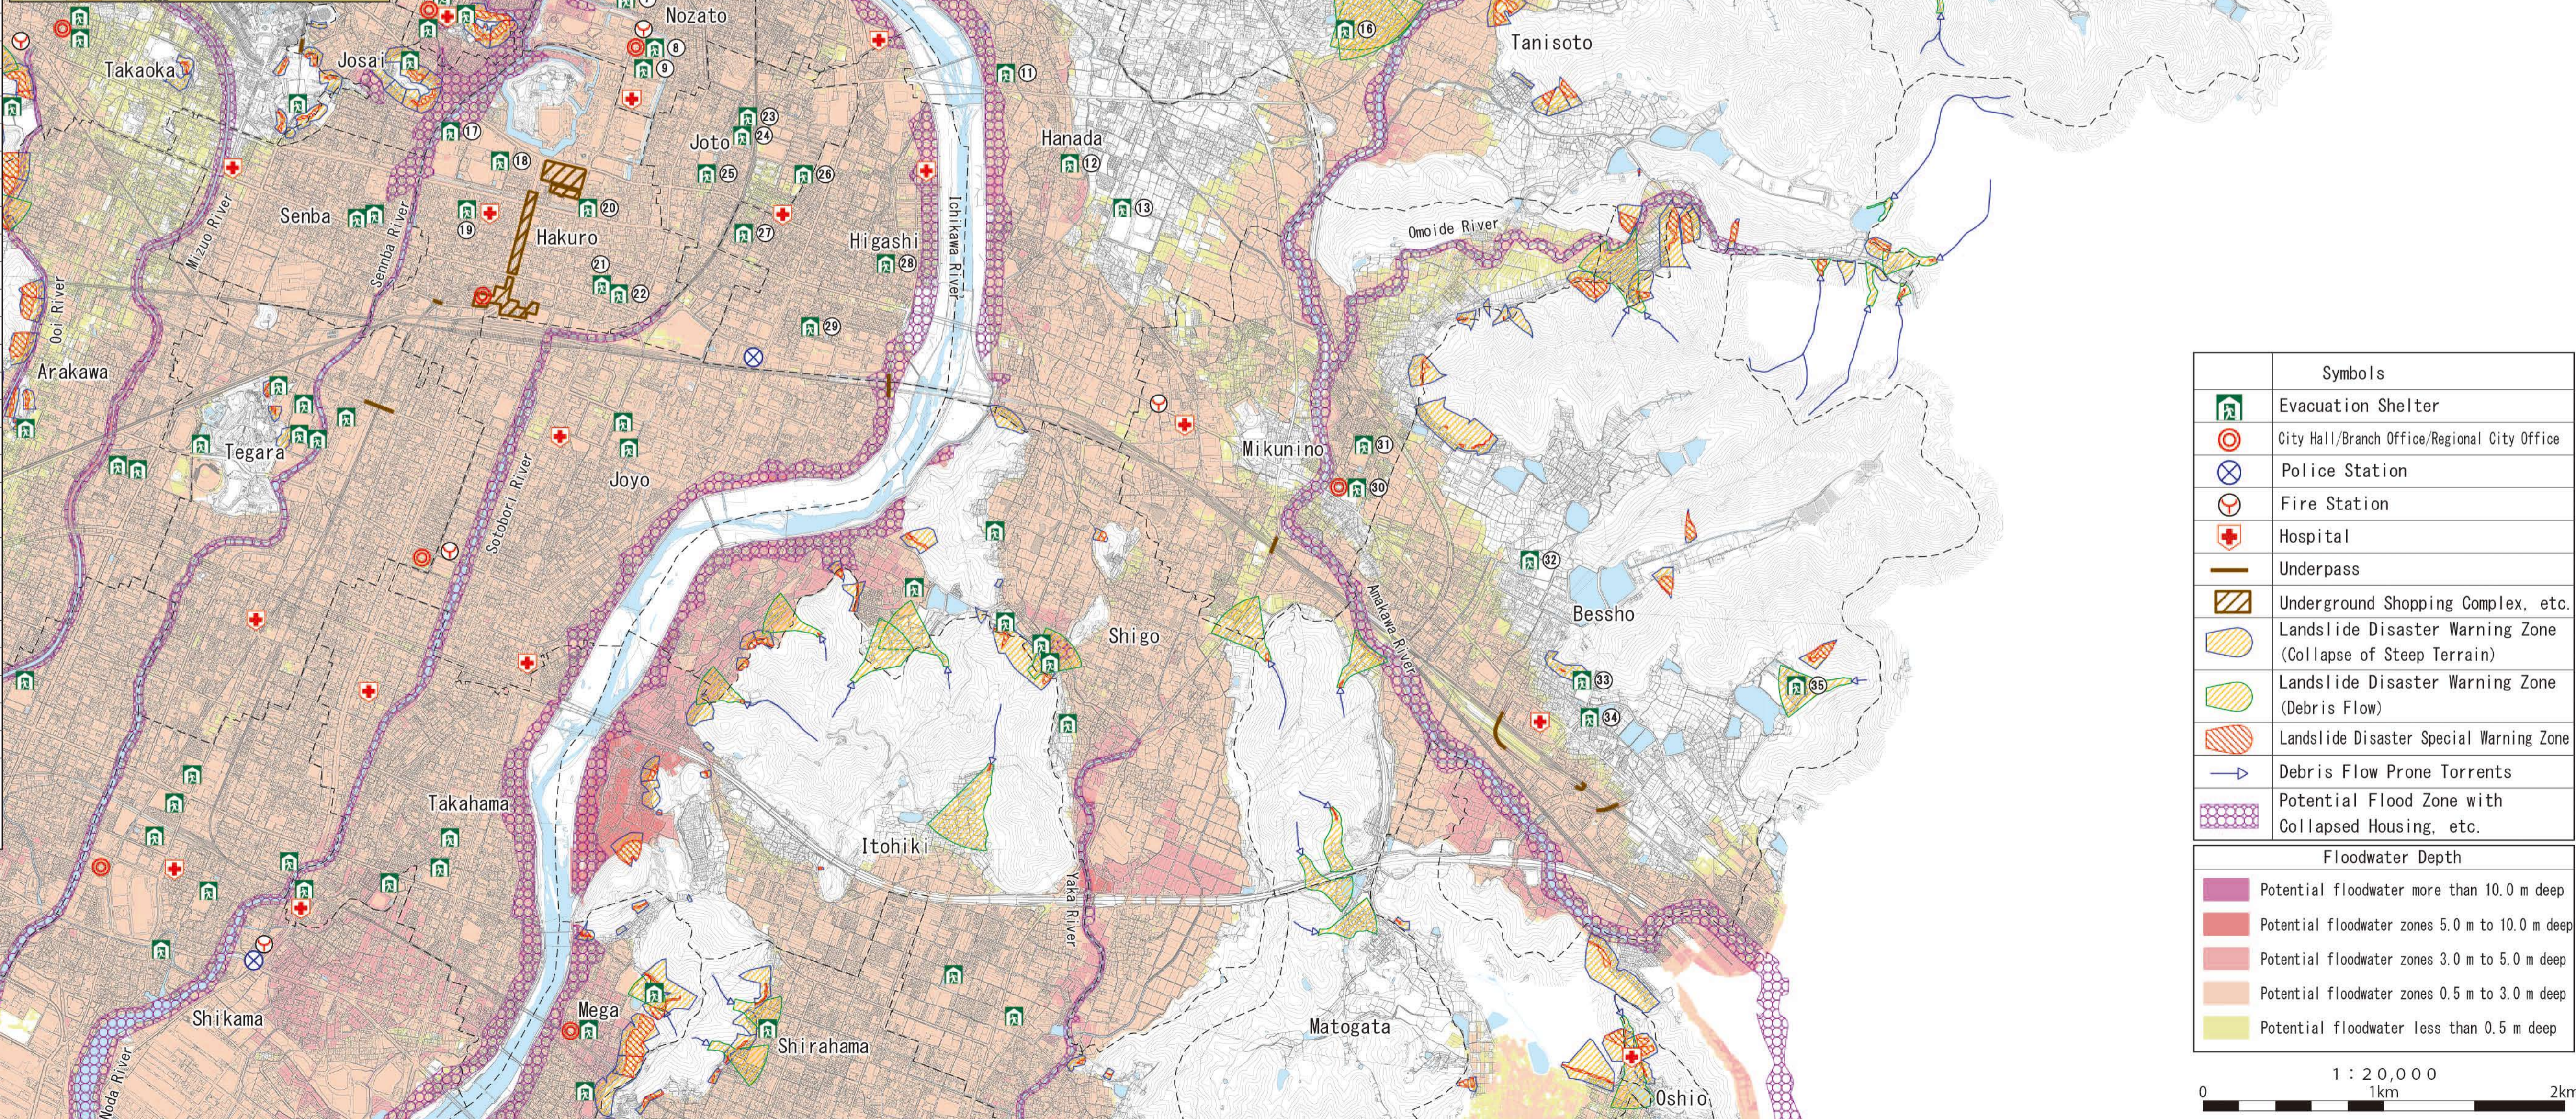

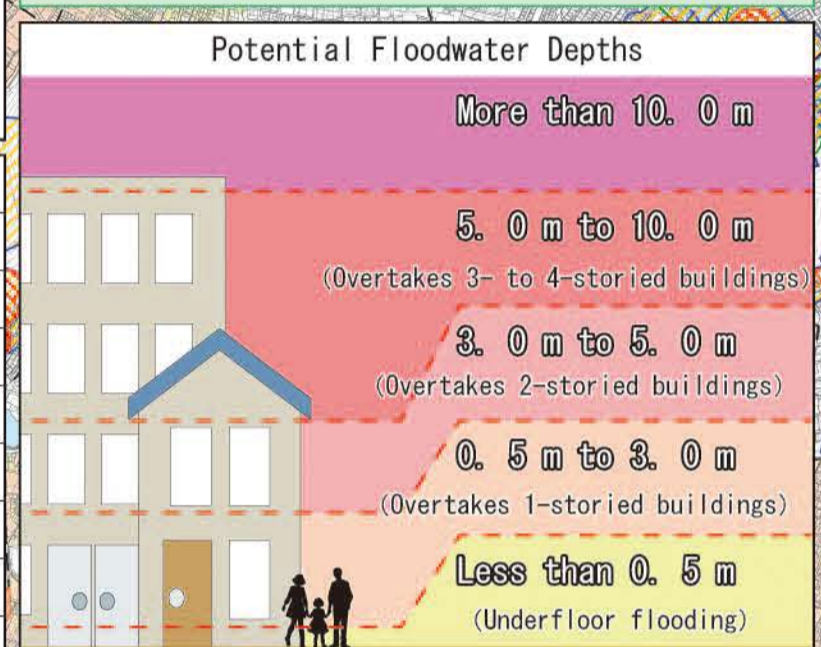

Warning level 2 Check the evacuation plan of action

Warning level 1 Prepare for the disaster

L2: Worst Case Scenario
Once in 1,000-year Rainfall
